

These are our collective values. Everybody who respects and practices these values is welcome in RdF.

- **Initiative.** Having the intelligence to act without instructions from others.
- **Insurrectional practices.** It is our moral duty to practice and promote acts of insurrection against the structures of power.
- **Autonomy.** Having the responsibility to act in an independent and self-governed way.
- **Common responsibility.** If you do something wrong, the whole collective is responsible. So be careful. If you don't agree with a decision from the assembly, first respect it; then you can try to change it. Never talk about other comrades in their back. Always defend your comrades in public, even if you disagree with them in private.
- **Self-discipline.** This is not holidays. This is war. We can't afford to be lazy. We have to be ready all the time for resistance.
- **Sharing of common goods.** Life here is communal. Everything is shared. We respect private property, but discourage it.
- **Self-education.** Everybody should participate in, or propose, at least one of the self-education activities.
- **Self-critique.** Before criticizing others, take the time to see if you can improve in any way. When receiving a critique, take it, chew it, swallow it, and shut up.
- **Commitment.** To transform the promise into reality. To stay and fight in the difficult times also.
- **Rotation.** The way to avoid hierarchy by participating in all the practices and all the roles
- **Non-violent communication.** We encourage the peaceful way of talking, with political arguments or not. Violence is only accepted as self-defense and for protecting the autonomy of the project from general threats.
- **Anti-drug culture.** Promote a non drug taking way of life.
- **Common language.** We think that is self explanatory that in order to work in a political way together we should have a common understanding.
- **Self-defense.** Everyone should be able to defend him/her self from all the kinds of threats
- **Gender equality.** We don't discriminate by gender.
- **Anti-authoritarian / horizontal / non-hierarchical.** We should try to keep the right structures needed to avoid all these things.

- **Ecological consciousness and veganism/vegetarianism.** Its the way to sacrifice personal pleasure and habbits in order to achive the total liberation of animals and earth.
